

A Very Happy and Prosperous New Year

Trailblazer

SURFACE PROTECTION FILMS or **GUARD FILMS** are used to cover roof sheetings, metal surfaces, floor, furniture, etc against any scratches or any other damages, and to increase longevity. Manjushree successfully added an adhesion based film to its repository of products.

Bleed Green

* The boiler used to power some of the machinery lines in MIPL uses bio-mass fuel, instead of the exhaustible sources like diesel or coal.

* We have installed a cross-ventilation system in MIPL which consumes ten times less energy than other conventional systems. This, coupled with the glass fibre insulator sheets in our roofing keeps the temperature cooler by 6-8 degrees compared to the outside.

The Social Network

* We organized a free eye, ENT and Health camp for our Team Members, in association with the Lions Club of Guwahati, Kamrupa.

* We had a round of celebrations in MIPL with 'Secret Santa' and a self-crafted X-mas tree (with plastic waste, what else?).

Spotlight

We would like to congratulate and thank **Shiv Kumar Gupta** for completing 25 years with the Team this quarter. Guptaji has played a pivotal role in our journey, and we hope to continue growing with him.

Bond Strength

* Manjushree Group was awarded the **Guwahati Manufacturing Leadership Awards, 2018** in a ceremony conducted by World Quality Congress.

* We opened the doors of MIPL to diploma students in CIPET, who were enthralled by a first hand experience of the latest technology in the flexi-packaging industry. The event translated to bulk hiring.

Report Card

Manjushree Innovations Pvt Ltd has been certified by the BRC Global Standards for Packaging and Packing Materials. MIPL has been rated in the 'A' category, with Hygiene Category as 'High Hygiene'. BRC Global Standards is a globally recognized organization, and guarantees the standardization of quality, safety and operational criteria, and ensures that manufacturers fulfill their legal obligations and provide protection for the end consumer.

Testimonials

"Today, visited the unit. The unit is performing efficiently well. All the processes are automatic. Machines are of superb quality. Scope for extension and growth is huge. I hope the unit will flourish further."

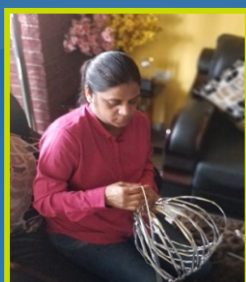

----Ajay Kumar Singh, GM, SBI

"Very nice plant. Good automation. High level of GMP and hygiene maintained. Keep it up."

----Mukul Sharma, Unit Head, GSK SRDN Site

Shout-out

When we're not using science to solve our problems, we make

use of arts. In this edition, we would like to thank one of our directors **Mrs Usha Mour** for her efforts in turning our industrial plastic waste into beautiful artefacts like bags, bins, vases, bouquets, baskets, mats, cushions, etc. She, alongwith our other female directors, have also held a workshop in a government school for the same.

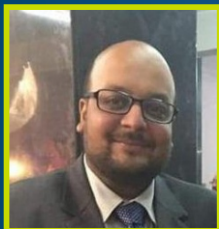

Trends

Recycled Plastic continues to find greater applications. With the help of Greater Hyderabad Municipal Corporation, part of the campus of National Physical Laboratory, Hyderabad was laid by tiles made up entirely of plastic waste.

Beacon

First of all, I would like to extend my heartiest congratulations to the entire Manjushree Family on achieving the BRC certification. Today, Manjushree has created an image of being customer focused, system oriented, and an ethical & professional organization. We have nurtured a culture of transparency in the organization, and need to continue building better trust amongst ourselves.

We should remember that a healthy competition is not about leaving others behind; but about competing within so that we become a better version of ourselves. Also, we all should note that *sword* and *words* have the same letters, and may have the same effect if not handled properly, so we should choose our words wisely,

Wish more success to the entire Team. All the best. Keep Rocking!
